

# DESIGN MEETS JOINT

**PCI DURAPOX PREMIUM MULTICOLOR  
FOR JOINTS JUST IN LINE WITH YOUR TASTE**

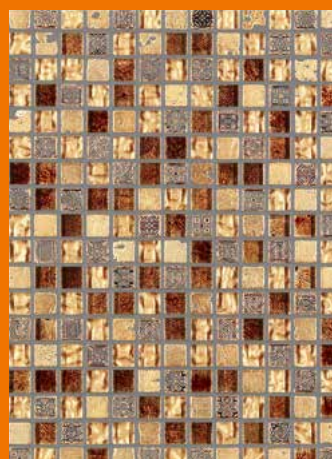

Find the suitable grout for every tile and let your tile covering have a calming or vivid effect – just in line with your taste.

- Maximum design creativity with about 400 color shades
- Variety of colors for individual designs
- Brilliant colors and homogeneous joint surface

# PCI DURAPOX PREMIUM MULTICOLOR

## MAXIMUM DESIGN CREATIVITY FOR INDIVIDUAL LIVING SPACES

PCI Durapox Premium Multicolor is available in any color shade. There are no longer any limits for your creativity. The unlimited color spectrum means maximum design creativity when planning and grouting your living space. The right grout color for every tile. Just in line with your taste. To complete this, there is the elastic sealant PCI Silcofug Multicolor in all matching colors.

Same covering – completely different effect with a different joint grout color

### Premium advantages

- Any color shade is possible – just in line with your individual taste
- Very smooth grouting behavior just like cement-based grouting mortar
- Easy to clean, resistant to acidic household cleaners and cleaning agents

### Joint grout colors determine the character of your room

The selection for the joint grout color has a large impact on the appearance of the floor or wall covering and thereby the whole room. Joint colors which are matched to the tile covering therefore make a room more peaceful and homogeneous.

Slightly deviating color shades between the grouted joint color and the tile covering can structure and enliven the surface area – while more contrasting grouted joint colors can specifically emphasize or soften the character of the tile color.
