JOINTS – A MATTER OF TASTE

The PCI joint range offers the right joint color for any tiled covering.

Professional chefs create harmony and surprising tastes by skillfully combining ingredients and matching the finest nuances with herbs and spices. Just like herbs and spices determine the taste of a meal, the color of the joints impacts on the design of the flooring and the entire room.

With PCI joint solutions, you can find the right joint color for any living space – whether to match or contrast with the tiling or other colors in the room, in line with your taste.

The joint color has considerable impact on the appearance of tiling and the whole room. Make full use of the possibilities available with PCI Durapox Premium Multicolor. And find the right joint color for any tile in the world.

The result is a composition combining the tiles and the joints and defining your individual living space. This reliable color range opens up entirely new design possibilities, just like spices can make a meal more tasty and show it in an entirely new light.

EXPRESSIVE COLORS

Find the right joint color and give your tiling a calm or vivid effect – in line with your taste. Make full use of the unlimited design possibilities to experience brilliant, homogeneous joint surfaces.

PCI DURAPOX PREMIUM EASY TO PROCESS

**Epoxy resin mortar for laying and grouting tiles –
as smooth as a cementitious joint grout**

The epoxy resin mortar **PCI Durapox Premium** has the smooth application behavior of a cementitious joint grout. It can be applied quite conveniently using one hand and no special tools are needed for grouting. The small size of the package is ideal for private showers from 1 to 2 m².

With its wide range of colors, **PCI Durapox Premium** is especially well-suited for laying and grouting attractive chemical-resistant water-impermeable surfaces with tiles, mosaic tiles and fully vitrified products on walls and floors.

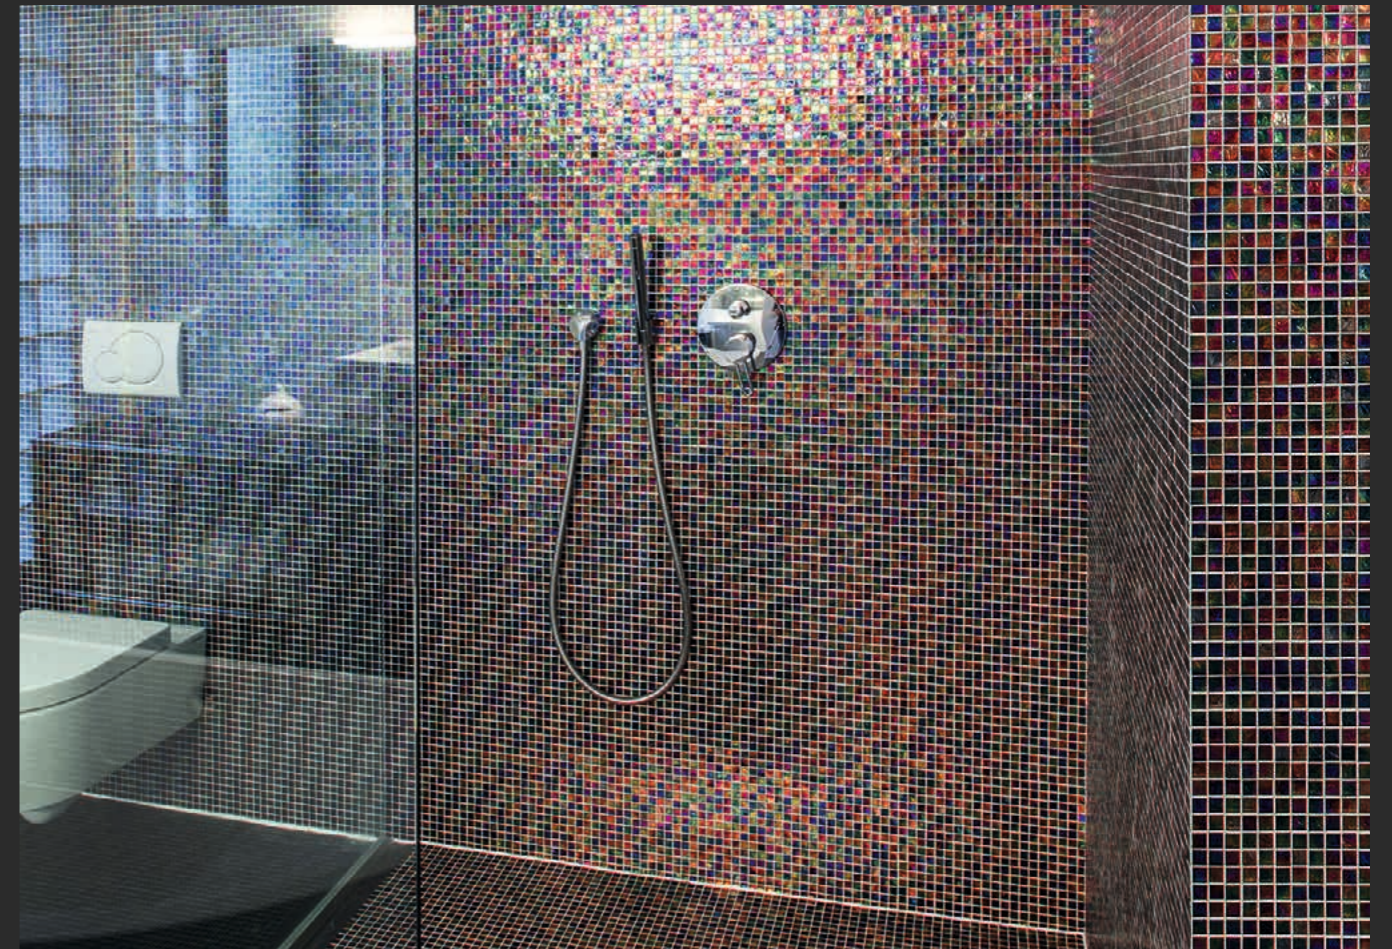

Easy laying and washing with one hand, without special epoxy resin tools.

Premium benefits

- Very smooth application behavior, like cementitious joint grouts
- Washing without residual film using PCI Durapox Finish
- Available in 17 brilliant colors for individual designs
- Very easy to clean and resists attack by acidic household detergents and cleaners

OVERVIEW JOINT COLORS

Joint width 1–20 mm.

PCI DURAPOX PREMIUM MULTICOLOR

DESIGN MEETS JOINT

Unlimited design possibilities for individual living spaces

PCI Durapox Premium Multicolor is available in any joint color you may need. There are no limits to your creativity. The epoxy resin mortar combines the technical highlights and processing properties of PCI Durapox Premium with a wide variety of colors for individual designs.

You can match the color of the joint precisely to the tiles or find the perfect contrasting color. The unlimited range of colors offers the maximum possible design creativity for planning and grouting your living space. And the elastic sealant PCI Silcofug Multicolor is available in matching colors to round off the effect.

Premium benefits

- Any joint color is possible – in line with your personal taste
- Can be worked just as smoothly as cementitious joint grout
- Easy to clean, resists acidic household detergents and cleaning agents

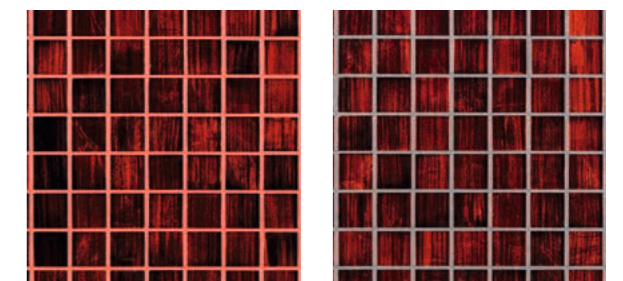

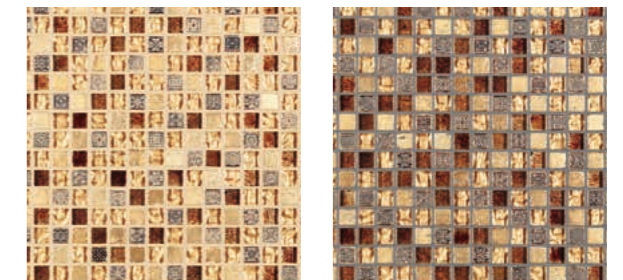

Very easy grouting without any residual slurry with PCI Durapox Premium Multicolor.

Joint colors define the character of your room

The color of the joints has an enormous impact on the effect of a tiled covering and the design of the entire room. Joints harmonized with the tiled covering give a room a calm, homogeneous effect. A slight divergence of tones between the joint and the tile gives the surface structure and makes it more lively. Strongly contrasting joint colors emphasize or reduce the emphasis on the character of the tile.

The same tiles – but an entirely different effect with different joint colors.

New logo: maximum design creativity

The new logo with the brightly colored butterfly is used for products offering maximum design creativity. It represents unlimited design freedom and indicates PCI products that can be used to create individual living spaces in line with your taste. This way, you become a designer and give every room a unique character – from private bathrooms via wellness areas, living rooms, kitchens, commercial kitchens and dining rooms to swimming pools.

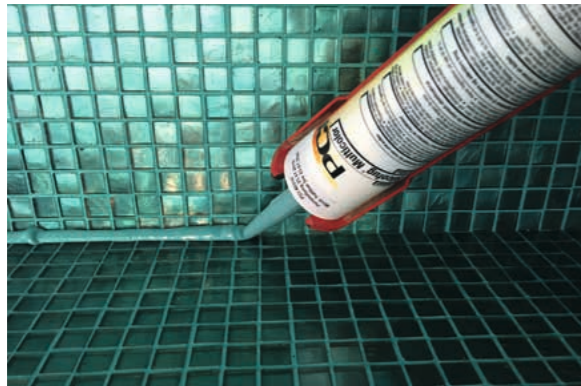

PCI SILCOFUG MULTICOLOR

SILICONE SEALANT WITH MULTICOLOR COLOR RANGE

Elastic sealant for indoor and outdoor use

PCI Durapox Premium Multicolor is available in each of the 400 or so colors in the PCI Durapox Premium range, ensuring matching colors and a harmonious overall effect.

Easy sealing of corner, movement and perimeter joints in sanitary facilities and swimming pools as well as on balconies and terraces.

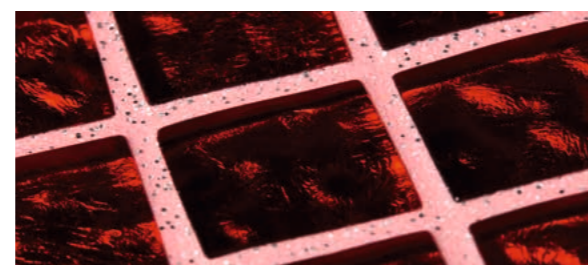

PCI PREMIUM GLITTER

EXCLUSIVE EFFECTS

Color glitter for mixing with PCI joint grouts

PCI Premium Glitter enhances and underscores the character of the joint with further design effects. In line with your personal taste, the metallic glitter, available in gold, copper and silver, with coarse and fine consistencies, gives living spaces a high-quality, exclusive design.

For mixing with all color versions of PCI cementitious and epoxy resin joint grouts.

PCI DURAPOX FINISH

CLEANING AGENT FOR EPOXY RESIN MORTARS

For easy washing of epoxy resin joint grouts without residual slurry

- 500 ml spray bottle (liquid)
- 750 g can (concentrate for adding to washing water)

Before the final washing of the surface, PCI Durapox Finish (liquid) is sprayed onto the surface after about 60 minutes. Alternatively, PCI Durapox Finish (concentrate) may be added directly to the washing water.

High-quality glitter colors in gold, copper and silver. Available in two different consistencies.

PCI COLORCATCH NANO PROFESSIONAL, INDIVIDUAL ADVICE

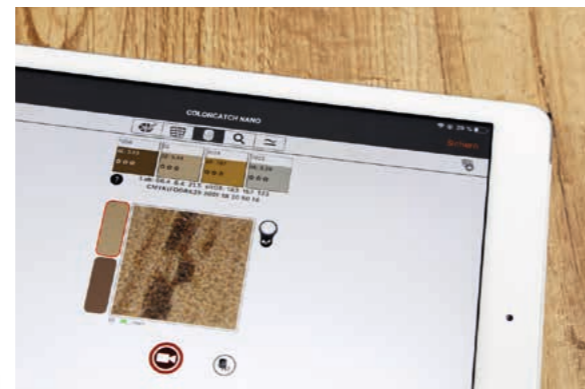

The digital color measurement device visualizes matching color harmonies in a matter of seconds

With the **PCI Colorcatch Nano** digital color measurement device, you can find the right joint color for individually designed rooms quickly and easily.

Your digital color adviser visualizes matching color harmonies in a matter of seconds and helps you develop individual, convincing solutions. The tool precisely measures the color of smooth, structured or patterned surfaces, is easy to operate and lays the foundation for harmonious results.

Individual joints thanks to professional color advice

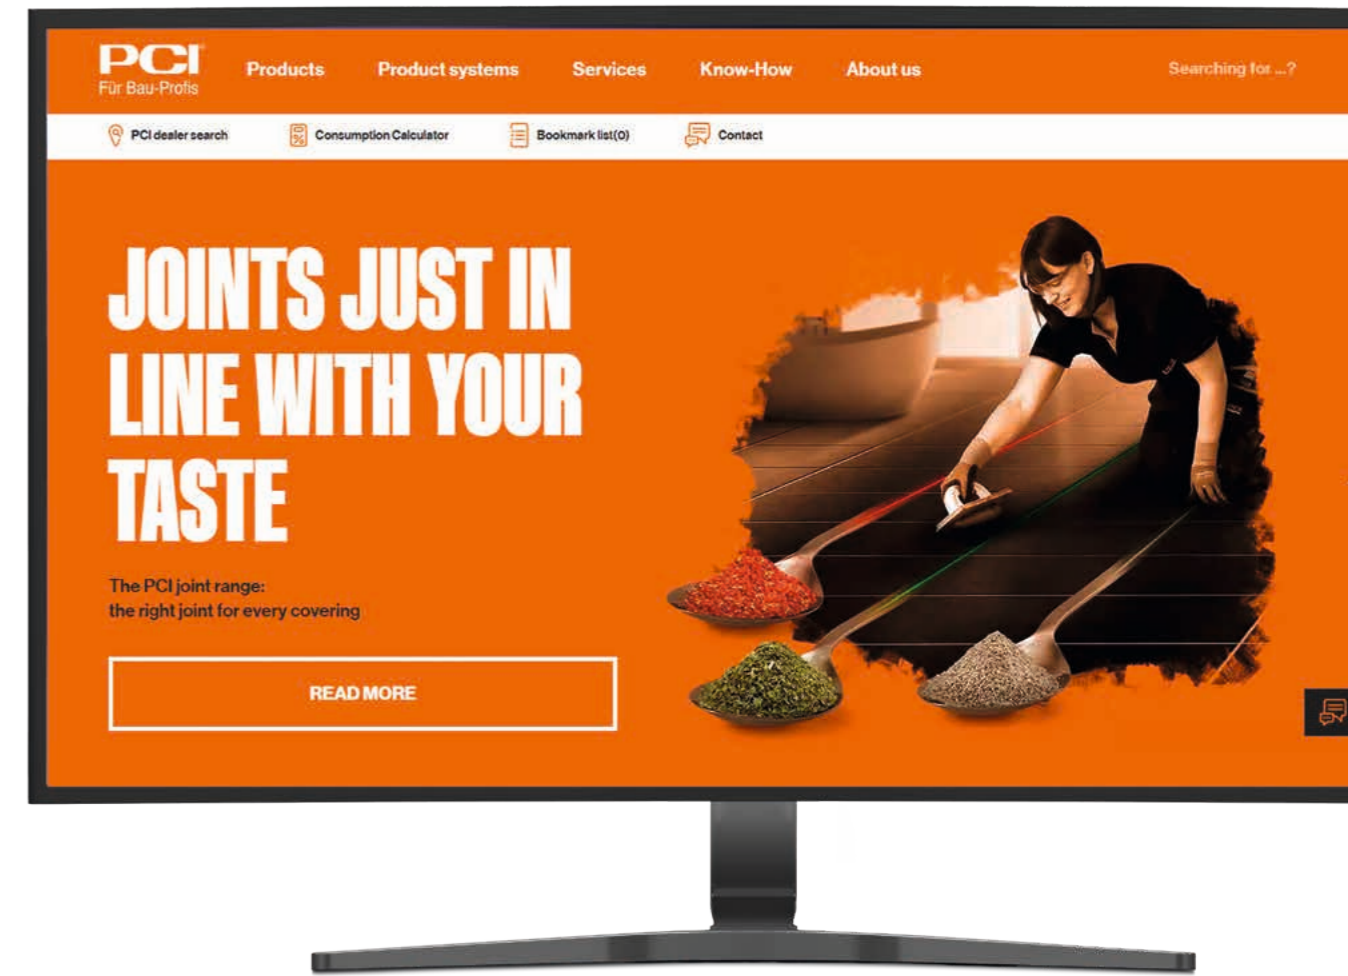

- Boosts your personal advice skills
- Offers simple, digital color selection
- Your door opener for new customer segments

Just scan your tile with PCI Colorcatch Nano and select the appropriate joint color in the PCI MULTICOLOR app.

PCI Colorcatch Nano functions in combination with the PCI app MULTICOLOR for IOS and Android.

PCI Multicolor palette

All the PCI Multicolor colors are shown in the palette using high-grade mineral dyes. This rounds off the PCI Multicolor package in combination with the PCI Colorcatch Nano.

PCI DURAPOX PREMIUM HARMONY

GLASS MOSAICS AND JOINTS WITH HARMONIZED COLORS

Optimum color harmony thanks to high-refraction glass microbeads

Harmonized colors: **PCI Durapox Premium Harmony** is an innovative epoxy resin mortar developed especially for grouting multi-colored glass mosaics on walls and floors. It is the perfect addition to the PCI grout range.

The grouting material is transparent and almost invisible. It collects light and reflects the light transmitted by the surrounding mosaic stones. As a result, the joint assumes the color of the glass mosaic without adversely affecting the overall appearance. This effect highlights the colors of the glass mosaic in the ideal way, making the covering considerably more attractive.

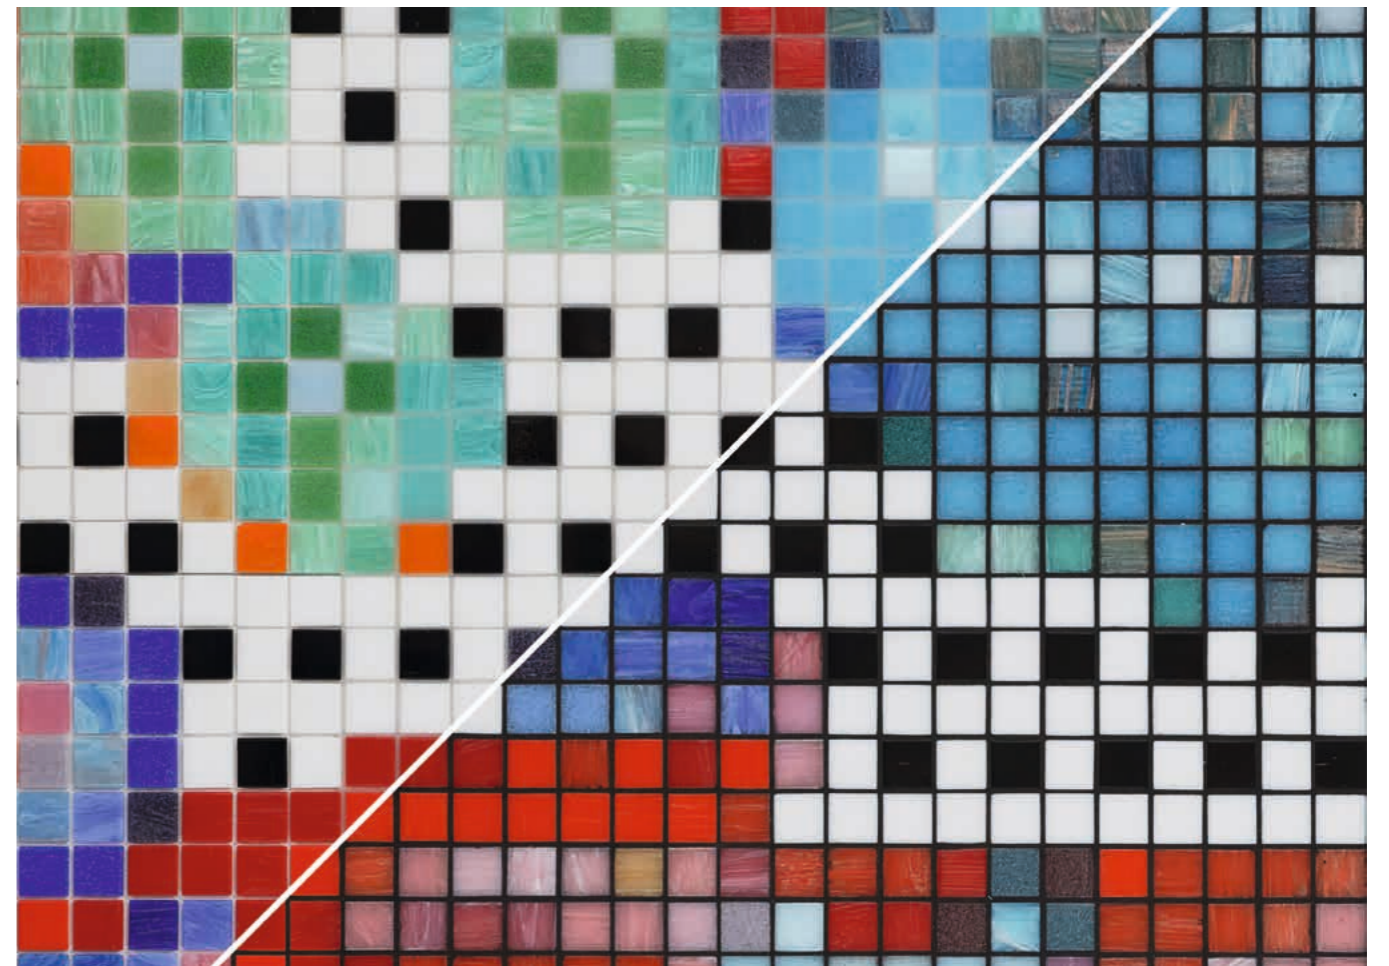

Very creamy insertion behavior, like a cementitious grout. Also easy to clean.

Premium benefits

- Ideal for bonding and grouting multi-colored glass mosaics
- Harmonious color progression – assumes the color of the surrounding glass mosaics
- Water-impermeable, resists staining and dirt (chemical-resistant)

In direct comparison with a cementitious grout, the harmonious effect of PCI Durapox Premium Harmony on the surface of a glass mosaic can clearly be seen.

ATTRACTIVE - ANY TIME, ANY PLACE

Cementitious joint grouts from PCI lay the best foundation for absolutely exclusive joints in terms of appearance and function. These products are available in many brilliant colors, with a fine surface consistency, and are very easy to clean.

PCI NANOFUG PREMIUM

UNIVERSAL ELEGANCE

Multi-use flexible joint grout for all tiles and natural stones

PCI Nanofug Premium multi-use flexible joint grout is a genuine all-rounder and is also recommended for joints that really need to look good. The premium joint grout is ideally suited for all tiles and natural stones of all types and sizes. Thanks to its unique combination of added benefits in terms of appearance and technology, this is a dependable choice for contractors, building owners and planners.

With its range of 28 colors, **PCI Nanofug Premium** offers the right design possibilities for any style – in line with current trends, especially the trend towards wood and concrete effects for tiled coverings. The earth tones harmonize with modern wood-effect tiled surfaces. The grey and black tones harmonize with modern tiles with grey nuances and concrete effects.

The very fine mortar structure and the strong flank bonding are special features of PCI Nanofug Premium, even in very narrow joints.

Benefits

- Fine surface and brilliant coloring for joints that need to meet the highest esthetic standards
- Long working time of about 40 minutes; can already be walked on after about 2 hours
- Improved protection against certain types of mold and microorganisms
- Easy to clean and resists attack by acidic household detergents and cleaners

PCI NANOFUG

ATTRACTIVE IN ANY SURROUNDINGS

Multi-use flexible joint grout especially for non-vitrified and vitrified tiling

The classic joint grout **PCI Nanofug** is a tried and tested all-rounder meeting high esthetic requirements. It is simply unbeatable for grouting non-vitrified tiles.

The plastic, creamy joint grout, available in 17 different colors, has convincingly convenient processing properties.

PCI Nanofug is easy to clean and is also suitable in the case of severe moisture exposure in bathrooms and showers, as well as on balconies and terraces.

Smooth, easy grouting with PCI Nanofug.

Benefits

- Convenient processing properties
- Water-repellent, dirt-repellent surface
- Easy to clean (with **easy-to-clean** effect)

RECOMMENDATIONS TO MAKE WORK EASIER

Recommendations for cementitious joint grouts

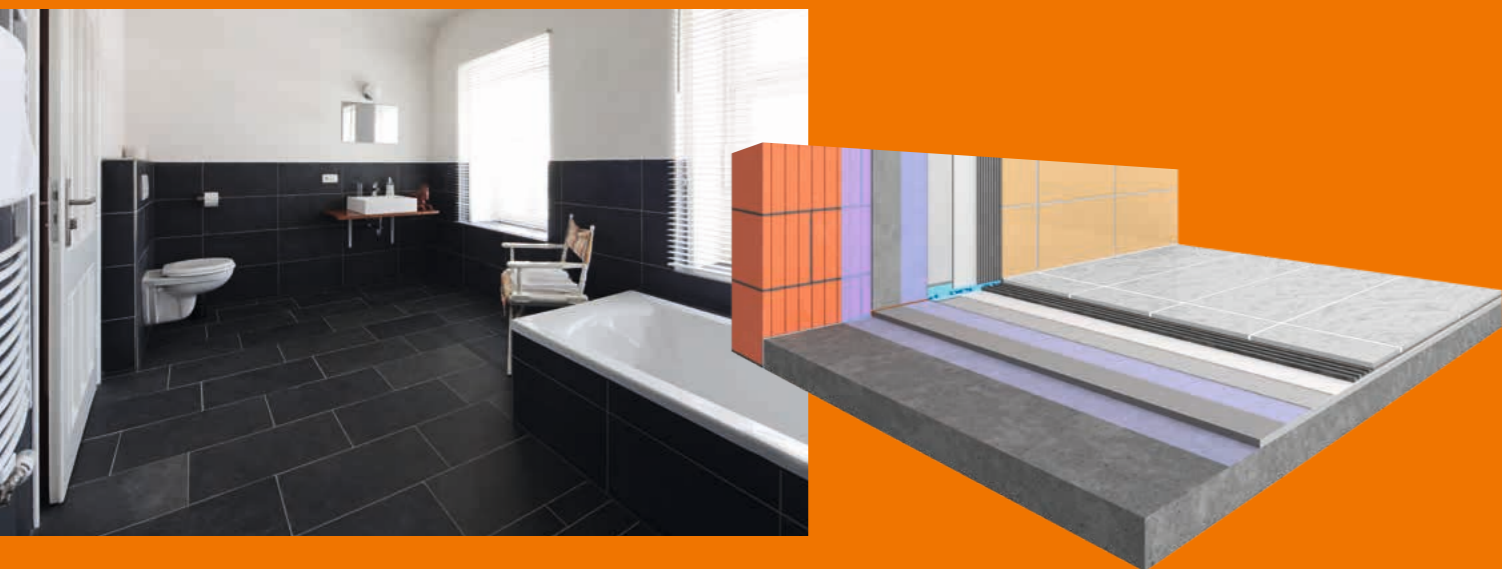

PCI Nanofug Premium or PCI Nanofug?

There are various criteria for selecting the right joint grout. The joint grouts described above can be used in a variety of applications and also have their individual strengths. For example, **PCI Nanofug Premium** has added benefits

in terms of esthetic and technical properties and is always a good choice. The table below provides suggestions on the selection of the right cementitious joint grout for different tile materials.

Tile/flexible joint grout	Fully vitrified tiles	Vitrified tiles	Non-vitrified tiles	Natural stone
PCI NANOFUG PREMIUM	++	++	+	++
PCI NANOFUG	+	++	++	-

++ ideal +suitable -not suitable

PCI SYSTEM SOLUTIONS

The grout provides the finishing touch for the laid tile or natural stone surface. It also significantly creates the appearance for the covering and the room. With PCI you are always on the safe side from the very first coat of primer. Our systems cover all the working steps to ensure safe laying. In addition to the PCI systems Multi-Use Tiling and Multi-Use Natural Stone, we can also provide special system solutions, for example for swimming pools and balconies.

Detailed information on the PCI product systems is available on the PCI website. www.pci-augsburg.eu

PERFECT SEALING

of perimeter and movement joints

Elastic joint sealant for indoor and outdoor use

PCI Silcofug Multicolor

- Prevents mold and fungus development on sealant
- Very good processing properties
- Acid-curing, available in about 400 colors

Elastic joint sealant for indoor and outdoor use

PCI Silcofug E

- Prevents mold and fungus development on sealant
- Resists attack by household cleaners and disinfectants
- Acid-curing, available in 28 colors

Silicone joint sealant for natural stones

PCI Carraferm

- Does not cause edge staining
- Ideal for sealing perimeter and movement joints in natural stone sensitive to staining
- Neutral-curing, available in 8 colors

Note on colors

PCI joint colors are produced in accordance with your wishes. Despite all the care taken by you and by us, there may be slight deviations from the original color selected as a result of display variations and different product batches. When obtaining advice and selecting colors, different light effects on the tiled surface must be taken into consideration and the color palette should be used for color matching. The color palettes are produced using original samples. However, there may be slight color deviations as a result of the printing process. PCI Augsburg GmbH assumes no liability for measurement errors or for the incorrect use of PCI Colorcatch Nano.
