

PRESS RELEASE

Augsburg, April 11, 2022

Easy and quick to process, can be used directly

Mineral coating PCI Zemtec Outdoor for the renovation of exposed floors

Augsburg, April 11, 2022 – With the new PCI Zemtec Outdoor, PCI Augsburg GmbH is presenting a mineral coating for direct use for outdoor areas as well as for wet indoor areas. PCI Zemtec Outdoor is particularly resistant to weather conditions, frost / de-icing salt and permanent moisture, can be installed quickly and easily and is characterized by its variably adjustable, flowable consistency. PCI Zemtec Outdoor convinces with a high degree of convenient application, reliability, variability as well as time and cost savings on the construction site.

With PCI Zemtec Outdoor, PCI is launching a mineral coating that is very resistant to the effects of the weather, frost / de-icing salt and permanent moisture and is therefore particularly well suited for use in outdoor areas exposed to the weather. Indoor surfaces that are repeatedly exposed to moisture, temperature fluctuations or the effects of de-icing salt, such as garages, also benefit from the new product.

The material is very easy to apply and can be optimally applied to drains and edges. New features are the direct usability in outdoor areas at low layer thicknesses of 3-20 mm and the consistency of the material. Thanks to the variably adjustable, flowable consistency, even an existing slope of up to 2%

can be coated evenly and without the use of force and without the material slipping. The slope is thus maintained.

PCI Zemtec Outdoor is also suitable for surfaces driven on by vehicles with pneumatic or solid rubber tires and thus forms the basis for PCI's new mineral-based garage system.

We recommend to treat the surface with the aqueous, mineral impregnation PCI Zemtec Protect as additional protection against stains and for easier cleaning of the surfaces. The product is offered in a practical combined unit containing the two components in the appropriate mixing ratio.

"The new PCI Zemtec Outdoor is ideal for the quick and easy repair of floors in garages or on areas exposed to weather conditions. Craftsmen benefit from the convenient processing thanks to the flowable consistency that can be adapted to the local conditions and the direct usability. The fact that a top layer is not necessary saves both time and money on the construction site," says Stephan Tschernek, Head of Marketing at the PCI Group. "Together with the impregnation PCI Zemtec Protect, this combination is a real alternative to the well-known resin-based floor coatings."

About PCI

PCI Augsburg GmbH is part of MBCC Group and leader in the tile laying materials sector for specialist firms in Germany, Austria and Switzerland. In addition, the company supplies product systems for waterproofing, concrete protection and repair, as well as a complete product range for the flooring sector. The PCI Group employs a staff of more than 1,200 in Europe and generated sales of significantly over €350 million net in 2021. Further information about PCI on the Internet under www.pci-augsburg.de.

About MBCC Group

The MBCC Group is one of the leading suppliers of construction chemicals and solutions worldwide and has emerged from the carve-out of the former BASF Construction Chemicals business from BASF Group. We offer innovative and sustainable products and solutions for the construction industry across different sectors, such as buildings, structures, underground construction, new construction, as well as for renovation. Our strong brands Master Builders Solutions®, PCI®, Thermotek®, Wolman®, Fire Protectors®, Colorbiotics®, Watson Bowman Acme®, TPH® and Bluey® and Nautec™ are well established in the marketplace. With our innovations, we address sustainability challenges in the industry. MBCC Group consists of approximately 70 legal entities worldwide and is home to around 7,500 construction experts in over 60 countries. For more information go to: www.mbcc-group.com.

We build sustainable performance.
