

# PRESS RELEASE

Augsburg, 12.04.2023

Balanced processing and setting behavior

## **New leveling mortar PCI Polycret 50 for manual and mechanical processing**

**Augsburg, 12.04.2023 – PCI Augsburg GmbH is launching PCI Polycret 50, a new leveling mortar that is suitable for layer thicknesses from 3 to 50 mm and can be sprayed or applied by hand. For multi-use application, PCI Polycret 50 scores with long working time, high area performance when used by machine and fast setting. This guarantees rapid construction progress.**

[PCI Polycret 50](#) adheres to a wide variety of substrates (concrete, aerated concrete, masonry as well as plaster, lime plaster, cement and cement plaster or concrete floors) and can be easily covered with fine plaster, tiles or, in the interior, with a waterproofing layer according to the WTA data sheet (e.g. PCI Barraseal). As a waterproofing plaster, it meets the requirements of a water-repellent plastering mortar, is waterproof, resistant to chlorinated water, weathering and frost and can therefore be used universally indoors and outdoors. Due to its very good adhesion values, PCI Polycret 50 is even suitable for the application of reactive resin coatings.

The 1-component leveling mortar offers a long processing time of up to 50 minutes and is still fast setting: the material can be plastered over or covered with tiles after approx. 5 hours. Thanks to its very good non-sag properties, PCI Polycret 50 can also be applied in high layer thicknesses of up to 50 mm.

**Sitz der Gesellschaft:**

**Registergericht:**  
Amtsgericht Augsburg, HRB 6355  
USt-IdNr.: DE811143409

Craftsmen can apply the leveling mortar manually with a trowel or spray it on mechanically. When applied by machine, they benefit from the large area coverage and low post-processing effort.

The leveling mortar PCI Polycrret 50 is certified as very low-emission according to GEV-EMICODE EC 1 PLUS.

“Craftsmen want a leveling mortar that has an optimal balance between working time, pumpability, post-treatment and strength development. We offer the ideal solution for this with PCI Polycrret 50,” says Stephan Tschernek, Head of Marketing PCI Group. “As a material that is easy to spray, the leveling mortar is also excellent for leveling large areas in a short time. This supports rapid construction progress.”

#### About PCI

PCI Augsburg GmbH is part of MBCC Group and leader in the tile laying materials sector for specialist firms in Germany, Austria and Switzerland. In addition, the company supplies product systems for waterproofing, concrete protection and repair, as well as a complete product range for the flooring sector. The PCI Group employs a staff of about 1,150 in Europe and generated sales of almost €350 million net in 2022. Further information about PCI on the Internet under [www.pci-augsburg.de](http://www.pci-augsburg.de).

#### About MBCC Group

The MBCC Group is one of the leading suppliers of construction chemicals and solutions worldwide and has emerged from the carve-out of the former BASF Construction Chemicals business from BASF Group. We offer innovative and sustainable products and solutions for the construction industry across different sectors, such as buildings, structures, underground construction, new construction, as well as for renovation. Our strong brands Master Builders Solutions®, PCI®, Thermotek®, Wolman®, Fire Protectors®, Colorbiotics®, Watson Bowman Acme®, TPH®, Bluey® and Nautec™ are well established in the marketplace. With our innovations, we address sustainability challenges in the industry. MBCC Group consists of approximately 70 legal entities worldwide and is home to around 7,500 construction experts in over 60 countries.
