A brand of BASF – We create chemistry

New
formulation,
outstanding
convenience

PCI Seccoral[®] 1K

Flexible cementitious waterproofing slurry for balconies,
terraces and showers

- Creamy consistency for extremely convenient application
- Fast drying
- Odor and dust emissions minimized

PCI Seccoral® 1K

A new experience of convenient waterproofing

PCI Seccoral® 1K is the **most convenient single-component flexible cementitious waterproofing slurry on the market**. Thanks to a special combination of ingredients, the waterproofing slurry is especially creamy and workable. It can be applied to walls or floors **effortlessly** and **without significant force**. Thanks to its unique material consistency, considerably higher application rates can be achieved.

Improved formulation

- Creamy consistency for extremely convenient application
- Fast drying for rapid progress with construction and cost and time savings
- Odor and dust emissions minimized for pleasant working conditions

Product properties that convince professionals

- **Single-component**, PCI Seccoral® 1K only needs to be mixed with water on site
- **Crack-bridging**, effective protection against later cracks in the substrate
- **Crack-free curing**, the coating does not crack or crumble
- **Reliable bonding**, no special primer or bonding slurry required
- **Applications**: for indoor and outdoor use on walls and floors
- **Packages available**: 15 kg sacks and 3.5 kg bags

Long working time: rapid construction progress

- Fast drying: floor coverings can be laid after about 5 hours, even after application in two steps
- Optimum adhesion for bonding fittings and waterproofing collars
- Low consumption: 2.5 kg/m² with a dry film thickness of 2 mm

Approved by the construction authorities:
reliable, flexible waterproofing in accordance with the applicable standards

PCI Seccoral® 1K is in accordance with the standard for bonded waterproofing DIN 18534-3 and the standard for waterproofing interior rooms DIN 18534-5 (water exposure classes W1-I, W2-I and W3-I) as well as the standard for waterproofing balconies and walkways DIN 18531-5.

With its extremely creamy consistency, PCI Seccoral® 1K offers a new premium quality for the highest possible user convenience – as well as saving time.
